**QUALITY POLICY**

Rockwell Engineering provides a comprehensive suite of works. The works are generally completed on client's sites. The works provided primarily consist of HVAC ducting installations, cleanroom installations, pipe installations, plant installations, testing and commissioning along with general mechanical services and the project management thereof.

Rockwell Engineering is very focused on client requirements. Rockwell has implemented an Integrated Management System (IMS) which ensures the quality of works provided to the client. The client's needs and expectations have been determined and have been incorporated into Management Procedures and Operating Procedures within the IMS.

**The Quality Policy of Rockwell Engineering is to provide works which comply with the specified requirements of the client contract and comply with the relevant Codes of Practice and Statutory Regulations and Standards.**

Rockwell Engineering believes that the attainment of excellence in quality performance is the cornerstone of the company's success and future development.

We constantly aim to create quality awareness in all aspects of our business. We understand quality performance, as an ongoing process of improvement. We continually strive to achieve an improved understanding of client requirements. We continually try to provide works to the client in an ever improving and streamlined way.

The attainment of the company's quality objectives is the responsibility of all Rockwell employees.

Every Rockwell activity, from initial tendering to final handover of an operational and validated facility is subject to constant quality control measures which are implemented through our IMS using Management Procedures and Operating Procedures.

By continual refinement of our quality specific IMS procedures, we aim to further improve Rockwell Engineering's quality performance.

We insist that our subcontractors and suppliers work towards stringent quality parameters similar to those that Rockwell strives for.

**The Company will review this policy annually in the light of experience, developments and legislative changes. The review will be compliant with Rockwell Engineering's Management Review Procedure. Employees are encouraged to put forward suggestions for improvements to the Company.**
